

JOHN PAUL C. FRANCIA

FULL-STACK DEVELOPER

Quezon City, Metro Manila | +639477182600 | jconcepcionfrancia@gmail.com

PROJECT EXPERIENCE

ShopSphere - E-Commerce Platform

- Developed a full-stack e-commerce platform using React.js, Node.js, and MySQL, enabling users to browse, search, filter, and purchase products through an integrated shopping experience.
- Implemented shopping cart, checkout, authentication, and order management functionality, supporting essential e-commerce workflows from product selection to order placement.
- Integrated frontend components with backend services and MySQL database operations, enabling consistent data management across the application.

Brew's Co. - Point-of-Sale System

- Developed a full-stack POS system using Java and MySQL, automating order processing, receipt generation, inventory updates, sales monitoring, and user management.
- Implemented frontend and backend functionality with database integration and core system features, improving transaction, inventory, and administrative management.
- Integrated an AI-powered feature that analyzes high-selling products and generates combo meal suggestions, supporting sales strategies and customer engagement.

Snoopy – Finance Tracker

- Developed backend logic for a Python-based finance tracker, enabling users to record and manage financial transactions and expenses.
- Implemented MySQL database functionality for transaction records and expense data, providing structured and persistent financial information.
- Built financial data visualization features, helping users monitor and analyze their spending activity.

TomatoWise - ML-Based Tomato Care with Prescriptive Analytics and Disease Detection Capstone Project

- Integrated hardware components and developed Raspberry Pi applications for an IoT-based tomato monitoring system, enabling real-time environmental monitoring and disease detection.
- Integrated sensors, cameras, and network communication with a web-based platform, ensuring reliable data collection and system connectivity.
- Configured Raspberry Pi OS and static IP addressing, supporting stable device communication and system deployment.

WORK EXPERIENCE

Concentrix

Feb 2026 – April 2026

IT Operation / IT Support Intern

- Resolved hardware, software, printer, and network issues through first-level technical support, restoring system functionality and minimizing downtime.
 - Installed, configured, and reimaged Windows workstations while assisting with software deployment and system configuration, supporting reliable workstation performance and daily operations.
 - Diagnosed and resolved hardware, software, printer, and network connectivity issues, maintaining system availability and business continuity.
 - Managed Active Directory user accounts and monitored IT support tickets, maintaining accurate user access controls and supporting prompt incident resolution.
 - Assisted end-users by applying communication and problem-solving skills to technical issues, supporting effective resolution and user satisfaction.
-

EDUCATION

Bachelor of Science in Information Technology

2022 - 2026

Our Lady of Fatima University - Quezon City

TECHNICAL SKILLS

- **Development:** JavaScript, React.js, Node.js, Java, Python, PHP, HTML, CSS, C/C++
 - **Databases:** MySQL, SQLite , PostgreSQL
 - **Tools:** Git, GitHub
 - **Networking:** TCP/IP, DNS, DHCP, LAN/WAN, Subnetting
 - **IT Support:** Windows OS, Active Directory, Hardware & Software Troubleshooting, Ticketing Systems
-

CERTIFICATIONS

- CCNA: Introduction to Networks – Cisco Networking Academy
- CCNA: Switching, Routing and Wireless Essentials – Cisco Networking Academy
- IT Specialist: Networking – CertNexus
- IT Specialist: Python – CertNexus
