PROFESSIONAL SUMMARY

Bachelor of Science in Information Technology graduate with hands-on experience developing full-stack web, desktop, e-commerce, database-driven, and IoT applications. Built projects using React.js, Next.js, Node.js, TypeScript, Java, Python, PHP, and SQL databases, with experience implementing authentication, CRUD operations, APIs, responsive interfaces, and database integration. Completed an IT Operations and Support internship at Concentrix, strengthening troubleshooting, system support, and problem-solving skills. Seeking an entry-level software development role focused on building reliable and user-focused applications.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Java, Python, PHP, C, C++
- **Frontend Development:** React.js, Next.js, HTML, CSS, Tailwind CSS
- **Backend Development:** Node.js, Flask
- **Databases:** MySQL, PostgreSQL, SQLite
- **Development Tools, Platforms & Technologies:** Git, GitHub, Shopify, Raspberry Pi, Windows OS
- **Additional Knowledge:** CRUD Operations, Authentication, Database Integration, Responsive Design

SELECTED PROJECTS

Nexora — IT Infrastructure Management Dashboard

Next.js | TypeScript | Tailwind CSS | PostgreSQL

- Developed a full-stack IT infrastructure management dashboard for managing assets, employees, network information, maintenance records, and operational data.
- Built authentication, CRUD operations, search functionality, analytics, and maintenance ticket workflows.
- Connected the application interface, backend services, and PostgreSQL database to provide centralized management of IT-related information.
- Designed a responsive administrative interface for desktop and mobile use.

ShopSphere — E-Commerce Platform

React.js | Node.js | MySQL

- Built a full-stack e-commerce platform that enables users to browse, search, filter, and purchase products through an integrated shopping experience.
- Developed user authentication, shopping cart, checkout, and order management functionality.
- Connected React frontend components with Node.js backend services and MySQL database operations.
- Implemented core e-commerce workflows from product discovery through order placement.

TomatoWise — ML-Based Tomato Care & Early Blight Detection System | Capstone Project

Raspberry Pi 4 | Machine Learning | YOLOv8s | Fuzzy Logic | Python | React.js

- Developed and integrated Raspberry Pi applications for an IoT-based tomato monitoring and disease detection system as part of the project's core monitoring architecture.

- Connected environmental sensors, cameras, and network communication components with a web-based monitoring platform to support continuous data collection and device communication.
- Configured Raspberry Pi OS, and static IP addressing to support stable communication between connected system components and monitoring devices.

Brew's Co. — Point-of-Sale System

Java | MySQL

- Developed a point-of-sale system supporting order processing, receipt generation, inventory management, sales monitoring, and user administration across daily transaction workflows.
- Built core application functionality and connected the system with a MySQL database for persistent transaction, inventory, and user management records.
- Added an AI-assisted feature that analyzes high-selling products and generates combo meal suggestions to support sales planning and product promotion decisions.

Snoopy — Personal Finance Tracker

Python | MySQL

- Developed backend functionality for a Python-based personal finance tracker, enabling users to record, organize, and manage financial transactions and expense data efficiently.
- Implemented MySQL database operations for structured and persistent financial records.
- Built financial data visualization features to help users monitor and analyze spending activity.

WORK EXPERIENCE

Concentrix | IT Operations Intern

Quezon City, Metro Manila | February 2026 – April 2026

- Provided first-level technical support for hardware, software, Windows workstations, printers, and network connectivity issues across daily business operations.
- Installed, configured, and reimaged Windows workstations and assisted with software deployment and system setup for various end users.
- Assisted with Active Directory user account management and user access administration.
- Monitored IT support tickets, documented technical issues, and assisted with incident resolution.
- Supported end users by diagnosing technical issues and applying structured troubleshooting and clear communication throughout the resolution process.

EDUCATION

Bachelor of Science in Information Technology

Our Lady of Fatima University — Quezon City | 2022 – 2026

CERTIFICATIONS & TRAINING

- IT Specialist: Networking — Certiport
- IT Specialist: Python — Certiport
- CCNA: Introduction to Networks — Cisco Networking Academy
- CCNA: Switching, Routing, and Wireless Essentials — Cisco Networking Academy
- Shopify for Beginners — Udemy
